

Group Skipping Cooperative Game

The Challenge

To see how many people can jump at one time with a large skipping rope.

You will need:

- 1 long skipping rope

What to do:

1. Two adults or older children need to hold a skipping rope at either end.
2. Starting with two children, they need to stand in the middle and then jump together as the rope is swung around.
3. Keep adding another child to the jumpers. How many can jump at one time?

Ways to Extend

- Split the class into groups. Who can be the first group to get 5 skipping on their rope?
- Which group can have a certain number of people skipping for the longest?
- Can you hold hands with the other people while you are jumping?
