

## **Environmental review notes:**

Things we are doing well:

- A lot of children walk to school
- All children and staff have re-useable water bottles.
- Each classroom has a recycling bin.
- Bikeability
- Outdoor learning
- Plants in the classrooms and outside in pots
- We have enough bins and emptied regularly.

Things we could be doing better:

- Looking at the things we use as a school and if there is more eco-friendly way of using the things or ordering them.
- More litter picks in school and the community.
- Look at the energy we use and make changes where needed.

Topic we want to work on during our Action Plan:

- Marine:
  - o Clean up the school pond so it can be used for lessons
- Waste:
  - o Start using our two compost bins in the Eco Garden
  - o Organise regular litter picks at school and in the local community
  - o Look at alternatives to using paper towels to dry our hands.
- Healthy living
  - o Grow fruit and veg in the Eco garden.
