

Try this...

Space explorer

- * Show your child the world **from different points of view.**
- * When they're in your arms, crouch down low or **gently lift them up in the air.**
- * Describe what you're doing **and respond to their reactions.** "You're as high as the light! Look what you can see up here!"

The science bit

Moving your child around and talking about what you're doing helps them learn about important concepts like shape and space. Children learn these concepts through back and forth conversations, where you follow their lead and respond to their reactions.

EVERY CHILDHOOD IS WORTH FIGHTING FOR
